Our research and industry partnerships are comparable to the best in the world.

The four pillars of NMIMS building blocks are: (a) knowledge creation that is relevant and applied, helping Society to know the unknowns, demonstrating leadership and meeting expectations in knowledge creation, and (b) enhancing teaching and learning through "Assurance of Learning" System, (c) making NMIMS known/recognized for its academic excellence and the most preferred institution of learning, and (d) aligning stakeholders and meeting their aspirations. NMIMS aims to work towards these building blocks through a culture of dialogue, collaboration, and mutual trust.

The University's innovativeness is borne by many programs visualized in a value-driven manner. NMIMS has always believed in remaining relevant and, at the same time, engaging in knowledge generation and dissemination. NMIMS faculty today is an eclectic mix of young and young at heart, having academic and industry experience, and those with national and foreign qualifications. With this mix of faculty, you will have the opportunity to learn from NMIMS's ethos to develop socially sensitive professionals and live in harmony with the environment.

The student resource book guides you on University rules and regulations and will help you navigate your journey here at SVKM's NMIMS. During your stay at SVKM's NMIMS, we would like to ensure clarity and transparency in our communication. The Student Resource Book (SRB) has been divided into three parts. Part I comprises the University information, rules and regulations alongwith required annexures that you would need to know. Part II has school-specific details for your effective and smooth interaction with the school. Also listed are facilities provided by the institution.

The SRB contains a Student Undertaking page at the end of the document, which you are required to sign and submit to your course coordinator by the suggested date.

We would also like your support to maintain and enhance the University's image and uphold its values. We value your feedback.

4. Academic Guidelines

4.1 Credit Structure

Credit structure is defined in terms of contact hours assigned for various academic components of a program. This includes classroom lectures, tutorials, practical sessions, projects, seminars, lab work, group work and any other academic activity for which contact hours are assigned in the curriculum. The details are as follows:

Trimester Pattern: For trimester pattern programs the credit specifications are as follows:

Details	Credit	Equivalence in hours in 10 weeks of Trimester
Theory Courses	1 credit	10 hrs.
Lab/Tutorial/Group/Presentation work	1 credit	20 hrs.
Seminar (subject to schedule throughout trimester)	1 credit	20 hrs.
Project work	1 credit	20 hrs.
Internship	1 credit	40 hrs.
Research paper/ dissertation	1 credit	20 hrs.

Semester Pattern: For Semester pattern programs the credit specifications are as follows:

Details	Credit	Equivalence in Hours in 15 weeks of Semester
Theory Courses	1 credit	15 hrs.
Laboratory Course / Studio activities	1 credit	30 hrs.
Tutorial Courses (Applicable for Technical Schools only)	1 credit	15 hrs.
Workshop-based activities *	1 credit	30 hrs.
Seminar / Group Discussion (Subject to schedule throughout the semester)	1 credit	15 hrs.
Project work & Dissertation	1 credit	30 hrs.
Internship (Max of six credits per semester)	1 credit	30 hrs. per week
Field-based Learning/Practices / Projects	1 credit	30 hrs.
Community Engagement and Service #	1 credit	30 hrs.

***Workshop-based activities:** Courses involving workshop-based activities require the engagement of students in hands-on activities related to work/vocation or professional practice. Every student is engaged in performing a skill-based activity related to specific learning outcome(s).

Community Engagement and Service: The Curricular component will involve activities that would expose students to the socio-economic issues in society so that the theoretical learnings can be supplemented by actual life experiences to generate solutions to real-life problems. 30 hrs of contact time per credit in a semester along with 15 hrs of activities such as preparation for community engagement and service, preparation of reports, etc., and independent reading and study. Thus, the total learner engaged time would be 180 hours for a 4-credit course.

4.2 Credit requirement to be eligible for the award of a degree:

It is required to define a minimum and a maximum credit requirement for awarding the degree of the program, along with the range of credits of every program. Under any circumstances, a student has to secure a minimum number of credits for a particular program to be eligible to get the degree.

Every programme has a minimum credit requirement in accordance with the applicable norms prescribed by the respective statutory/regulatory bodies, such as UGC, AICTE, PCI, BCI, COA, etc., generally aligned with a minimum of 40 credits per academic year or as otherwise specified by the concerned statutory / regulatory body.

Any student seeking re-admission to a program shall be required to fulfil the minimum credit requirement prescribed for that program for the award of the degree, irrespective of any subsequent revision to the program structure of credits.

For example, if a student enrolled in a four-year BBA program is eligible for the award of the degree upon successful completion of a minimum of 160 credits after four years, considering the requirement of 40 credits per academic year, irrespective of the fact that the total credit requirement of the program structure has a total of 162 credits.

- 4.3 **Term-end examination** is a compulsory component. The mode of the Term End Examination will depend on the Course Learning Outcomes.
- 4.4 **Duration of examination**
 - 4.4.1 Minimum duration of Mid -Term Examinations: 1 hr.
 - 4.4.2 Minimum duration of Term End Examinations: 2 hrs.
 - 4.4.3 Examination duration can also be more than the above-specified time as defined by respective schools.
- 4.5 For all the programs, the weightage for each component will be specified by the Faculty and will form an integral part of the course outline (as per specific requirements of the school/program). The Faculty has the flexibility to formulate and implement an evaluation system with weightage specified in the course outline. While approving the courses, the HOD/Area-in-charge and the Dean/Director/ Associate Dean will ensure that the evaluation components and weightage points assigned to each component are fair. Such evaluation components should be announced to students before the commencement of course delivery.
- 4.6 For grading purposes, the weightage mentioned by the faculty in the course outline will be applied for each component of evaluation, irrespective of the marks assigned to the said component for the examination.
- 4.7 The minimum 15 number of students or 40% of the total number of students, to offer an elective course/s on the basis of the total number of students registered in that particular elective course.
- 4.8 Project Guidelines will be as per the requirements of the program of each school.

5. Internal Continuous Assessment (ICA)

- 5.1.1 It is the sole responsibility of every student to ensure that he/she completes all the components of Internal Continuous Assessment.
- 5.1.2 All components of ICA should be defined while designing the course syllabus by a faculty member. Those components and their weightage should be shared with the students at the start of the trimester/semester/annual term.
- 5.1.3 **Conduct of ICA components:** A timetable for the conduct of ICA components will be shared with the students by the school.
- 5.1.4 **ICA components Evaluation:** All the students shall be informed of the component-wise marks obtained by them within seven days of the conduct of ICA components by the respective faculty member or via the students' portal. Students are responsible for checking their marks on the portal. Any discrepancies in ICA marks should be informed and resolved within two days of publication on the portal.
- 5.1.5 **Passing Criteria for ONLY ICA course:** For a course that has only internal continuous assessment components and has no Term End Examination must be considered as an ONLY ICA course. The passing criteria for such ONLY ICA courses will be at 40% minimum of total of ICA marks. These passing norms may not apply to programmes where Regulatory bodies issue guidelines regarding passing norms.

If a student does not satisfy the passing criteria of 40%, there will be no re-examination for Only ICA Courses. If a student does not pass only ICA course, he/she must take re-admission in the same trimester/semester/annual term of the subsequent academic year of the program, or may opt for re-admission for the entire year of the program, provided they fulfill the eligibility criteria for re-admission mentioned in SRB. The student who fails in any only ICA Course may not be allowed to appear in the Term End Examinations of other courses.

- 5.1.6 **Grace Marks:** Grace Marks will never be awarded on the ICA (Internal Continuous Assessment) Component, irrespective of whether the course has TEE or only ICA components.
- 5.1.7 **ICA unfair practice penalties:** The adoption of unfair means by the candidates during the ICA component examinations is treated seriously, and appropriate penalties are imposed after following the University's

rules and regulations and principles of natural justice.

18. Feedback Mechanism:

SVKM's NMIMS has a well-established online feedback mechanism through the Student Portal for communication of perceptions. The components of this feedback mechanism are:

- 18.1 Feedback at the end of the third week of every trimester/Semester/annual term. Dean / Director /Programme Chairperson/HOD will meet students personally, if applicable.
- 18.2 Online Feedback through the Students Portal is taken using a questionnaire, preferably in the last session of every course in each trimester/semester/annual term. This feedback is compiled, and statistics are placed before each faculty member by the end of the trimester/semester/annual term.
 - 18.2.1 All students should get involved in this mechanism seriously, as it truly helps the SVKM's NMIMS improve the quality of services and teaching provided.
 - 18.2.2 These are open-ended questions in which students can reflect on learning and teaching aspects of the course.
 - 18.2.3 SVKM's NMIMS uses feedback to improve the teaching-learning process proactively.
 - 18.2.4 While sharing the feedback to the faculty members, the student's identity is kept confidential.

19. Mentoring Programme / 'Psychologist and a Counsellor':

19.1 Mentoring Programme:

Students (as applicable school-wise) have been assigned faculty mentors whose role is to help assimilate the SVKM's NMIMS culture, facilitate intelligent choice-making regarding the selection of courses, and help identify resources needed by all students. Do meet your faculty mentor regularly, as per their convenience and availability.

19.2 Psychologist and a Counsellor:

A Psychologist is a non-judgmental, qualified professional who understands, ensures privacy and confidentiality and guides you by giving choices so that you make the right decision. This process is facilitated using realistic, structured, and research-based therapy.

Managing emotions is vital to ensure all-rounded progress in life. We need to break down the old walls of myths and misconceptions to move towards growth. Visiting a counsellor (Psychologist) enables us to relearn more helpful, progressive, reality-based thinking strategies.

Personal counselling is essential at every step in life, even at the corporate level. What we think about situations, affects our subconscious mind and interferes with our present-day life.

As human beings, at any given time in life, we could go through challenges and have no one to share with or guide us. We often do not share our issues with family or friends due to the fear of upsetting or burdening them. We worry that perhaps they may not understand or could become judgmental. At such times, we recommend Personal Counselling.

- i. "I cannot concentrate or focus nor can I sleep, at times, I get so scared that I go blank in my exams!"
- ii. "Since the time he/she left me, I cannot put my attention to anything, I will not be able to live anymore.....can't bear it if she is not in my life!"
- iii. "I have lost my confidence, I feel worthless /hopeless; no one loves me. I don't want to live anymore."
- iv. "I feel nobody understands what I am going through..." (People become judgmental instead of understanding and supporting) "I feel people invalidate my feelings."
- v. "I do not know whom to share my feelings with. Where do I seek help? Who will be able to help me?"

Have you had any of these repetitive thoughts or faced a rejection that you cannot cope with?

Have you reacted very angrily at first and then later realised that reacting to the event was not needed, and in the process, you harmed the relations you had with your friends and family? Do you know what went wrong then? Do you understand what triggered you?

Just as we would treat a sprain with some ointment, we try to heal our emotional pain independently. When the sprain is not healing, we visit the doctor, and similarly, one sees the psychologist sometimes when we are unable to clear our emotional challenges on our own. The counsellor needs to check how deep your wound is, and usually, you are helped through therapeutic counseling.

We may be unaware of our behaviour's implications on others, but it eventually could affect our relations in daily life at home, in class, or at work. When past emotional situations are not dealt with therapeutically, we could develop unhealthy negative thoughts and feelings that we need to be aware of. They could again lead to complications and affect our performance, decision making, logical thinking, studies, relationships, and career. This continued stress can gradually affect our body and physiological health, causing hypertension, respiratory ailments, gastrointestinal disturbances, migraine and tension headaches, skin conditions, and ulcers. Understanding the mind-body connection is essential.

The biggest myth is that being emotional is to be weak, so often, we push all our emotional issues under the carpet and then take up unhealthy habits like smoking, drinking, and substance abuse to escape from our reality. We hope to feel better, which lasts only for a short time. On the other hand, it may create long-term damage leading to unhealthy dependency.

SVKM's NMIMS wants to ensure the holistic development of the students. We understand that to perform at your highest potential in your academic journey, your emotions and mental health need to be well-regulated and balanced. Therefore, have appointed a team of psychologists who you can connect with via call or email and set up a session to discuss any concerns that may be affecting you.

25 Safety Guide for Students on Floods, Fire and Earthquakes

SVKM's NMIMS gives utmost importance to safety of its students. It prepares students for natural hazards. The safety measures for some natural disasters, such as 1) Floods, 2) Earthquakes and 3) Fire, are highlighted briefly.

25.1 Floods: Precautions to be taken in case of Floods are given in Table 1 below.

Before Floods	During Floods	After Floods
- Identify and visit elevated areas in and around the Institute as places of refuge during a flood - Be aware of drainage channels and other low-lying areas known to flood suddenly. Consult and involve local authorities in the institutes - Check for the monsoon alerts for the heavy rains declared by the Municipal Corporation - Do not travel long distances on dates indicated as 'Monsoon Alerts'. Contact the Institute if there is any pre-planned activity or examination, or any other important work on that day, and try to adjust it on some other day - Keep locally available equipment such as ropes, batteries, radio, plastic bottles, and cans handy during the rainy season. This can help you to plan your rescue - Prepare a food kit including emergency food items such as biscuits, snacks, drinking water, and so on	- Evacuate to previously identified elevated areas - Your life is most precious. Avoid saving valuables at that moment. - Disconnect electrical appliances. - Turn off utilities at the main switches or valves if instructed to do so - Don't touch electrical equipment if you are wet or standing in water - Do not walk through moving water. Six inches of moving water can make you fall - If you have to walk in water, walk where the water is not moving - Use a stick to check the firmness of the ground in front of you - Avoid floodwaters; water may be contaminated by oil, gasoline, or raw sewage - Water may also be electrically charged from underground or downed power lines - Listen to the radio for advanced information and advice. Don't spread rumors - Move vehicles to the highest ground nearby - Do not enter floodwaters on foot if you can avoid it - Never wander around a flooded area - Drink clean water	- Stay away from downed power lines, and report them to the Security Officer - Leave the Institute / home only when authorities indicate it is safe - Stay out of any building if it is surrounded by floodwaters - Use extreme caution when entering buildings; there may be hidden damage, particularly on foundations - Floors in the building will be slippery due to water and mud. Walk carefully on the slippery floor. - Wear appropriate footwear. Do not use slippers during the rainy season - Watch out for loose flooring, holes, and dislodged nails - Clean and disinfect everything that got wet - Discard any food items which may have got wet - Inform them about the damaged drainage and sewage systems in and around the building to the authorities as soon as possible. These can be a major health hazard - First, protect yourself and then help others.

25.2 Earthquake: Precautions to be taken in case of earthquakes are displayed in Table 2 below:

Before Earthquake	During Earthquake	After Earthquake
- In a hostel or at home, keep heavy objects on lower shelves so they will not fall on you during an earthquake. - Make sure your water heater and gas cylinder are secured and intact. This will ensure that it will not fall during an earthquake and hurt someone or start a fire. - Keep a torch and a mobile handy. - Keep the corridors in the hostel/house clear of furniture and other things, making movement easier.	If you are at home or inside a building - Do not rush to the doors or exits; never use the lifts; keep well away from windows, mirrors, chimneys, and furniture. - Protect yourself by staying under the lintel of an inner door, in the corner of a room, under a table, or even under a bed. If you are on the street - Walk towards an open place in a calm and composed manner. Do not run and do not wander round the streets. - Keep away from buildings, especially old, tall, or detached buildings, electricity wires, slopes, and walls, which are liable to collapse.	If you are at home or inside a building - Expect aftershocks. Be prepared. Stay where you are and do not come out immediately. - Keep calm and obey any instructions you hear after you come out - Turn off the water, gas, and electricity - Do not smoke and do not light matches or use a cigarette lighter. Do not turn on switches. There may be gas leaks or short circuits. - If there is a fire, try to put it out. If you cannot, call the fire brigade. - Immediately clean up any inflammable products that may have spilled (alcohol, paint, etc.). - Avoid places where there are loose electric wires, and do not touch any metal object in contact with them. - Do not drink water from open containers without having examined it and filtered it through a sieve, a filter, or an ordinary clean cloth. - Eat something. You will feel better and more capable of helping others.

Before Earthquake	During Earthquake	After Earthquake
	If you are driving Stop the vehicle away from buildings, walls, slopes, electricity wires, and cables, and stay in the vehicle.	- If the building is badly damaged, you will have to leave it. Collect water containers, food, and ordinary and special medicines (for persons with heart complaints, diabetes, etc.). - Help people who are injured. Provide them with first aid. Do not move seriously injured people unless they are in danger. If you are outside - If you know that people have been buried, tell the rescue teams. Do not rush and do not worsen the situation of injured persons or your situation. - Do not re-enter badly damaged buildings and do not go near damaged structures. - Do not walk around the streets to see what has happened. Keep clear of the streets to enable rescue vehicles to pass. - Keep away from beaches and low banks of rivers. Huge waves may sweep in. - Keep updating yourself with the latest information on earthquakes through radio or TV.

25.3 Fire: Precautions to be taken in case of fire are given in Table 3 below:

Before Fire	During Fire	After Fire
- Identify the fire hazards and where fires might start, e.g., laboratories, storerooms, kitchens, and other such places. - Identify all the exit routes of the Institute. - Check the adequacy of the firefighting apparatus and its maintenance.	- Do not panic. Shout for help. - Do not run. - Do not waste time collecting valuables. - Inform the fire brigade about the fire and alert neighbors. - If possible, use a fire extinguisher. - Do not take shelter in the toilet. - Shut all the doors behind you while leaving the room to prevent fire from spreading everywhere. - Do not use the lift to escape. - Use the nearest means of escape and the staircase available. - Exit ground level instead of the terrace. - Report about your safe escape and any other information to the University authorities, fire brigade, or police present at the site. If trapped or stranded: - Stay close to the floor level. - Cover the gaps of the door with any piece of cloth available. - Do not jump out of the building. - Signal or shout for help. - Stop, drop, and roll on the ground and cover with a blanket; pour water on the body - Dial 101 or 22620 5301 for the fire brigade - Give the fire officer a detailed address, the nature of the incident, and the telephone number from which you are calling. Preferably, use a landline. Keep down the receiver and wait at the same spot. Control Room will call back to verify the call. - Wait for the Fire Brigade to arrive and co-operate with the firefighters.	Don't re-enter or permit anyone to enter the building, unless the fire officials have permitted entry.

25.4 In case of any injury caused or loss of life to the negligence of the student and/or due to natural calamities the institution shall not be held liable in any form of compensation and/or responsibility whatsoever.

Message from Dean

It gives me great pleasure to welcome you to the School of Pharmacy & Technology Management (SPTM), SVKM's NMIMS. Congratulations on securing admission to one of India's leading institutions in pharmaceutical education and research. The School has consistently been recognized among the top pharmacy institutions in India and has been ranked 11th Nationally by NIRF in 2025. As you begin this important phase of your academic journey, you are entering a profession that plays a vital role in advancing healthcare and improving the quality of life across the globe.

The pharmaceutical landscape is undergoing a remarkable transformation. Recent advances in precision medicine, biologics, cell and gene therapies, digital health technologies, and artificial intelligence are redefining the future of healthcare. At the same time, there is an increasing emphasis on sustainable pharmaceutical manufacturing, patient-centric healthcare solutions, and global quality standards. These developments require future pharmacists to possess not only scientific knowledge but also adaptability, innovation, ethical values, and a commitment to lifelong learning.

India today stands as a global leader in pharmaceutical manufacturing and is steadily emerging as a hub for research, innovation, and healthcare solutions. The opportunities available to pharmacy graduates have expanded significantly beyond traditional domains.

At SPTM, we remain committed to nurturing professionals through a robust academic framework, interdisciplinary learning opportunities, industry engagement, and a vibrant research ecosystem. Our distinguished faculty, state-of-the-art infrastructure, and student-centric environment are designed to foster critical thinking, creativity, leadership, and professional excellence. Our faculty, continue to earn accolades globally with several of them being featured among the “Top 2% Scientist” worldwide by Stanford University and Elsevier in the year 2025. A vibrant research culture is reflected with several Ph.D. scholars presently pursuing their doctoral studies at the School in diverse areas of pharmaceutical research. We encourage every student to actively participate in academic, research, innovation, and community engagement activities that contribute to holistic development.

The School Resource Book (SRB) serves as an important guide to the academic policies, regulations, and professional expectations of the School. I urge all students to familiarize themselves with its contents and uphold the values of discipline, integrity, responsibility, and mutual respect that define our institution. We also recognize the invaluable support of parents and guardians as partners in the educational journey of our students.

As you embark on this exciting chapter, I encourage you to remain curious, embrace challenges, and strive for excellence in every endeavour. Together, let us continue our mission of developing competent, compassionate, and globally responsible pharmaceutical professionals who will shape the future of healthcare.

I wish you a rewarding, enriching, and successful academic year ahead.

Best Wishes!

1.5 Value Added Compulsory Workshops/ Activities

1.5.1 Soft Skills:

Need: Pharma Graduates worldwide have shown that they are very strong in concepts and technical knowledge but are weak in soft skills. Industry consistently pointed out the same and based on industry feedback soft skill module has been developed.

Methodology: Soft skills training will be conducted in the form of lectures for all the first-year students (UG & PG). The lectures shall be a mix of role plays, activities, games, interactions, video recording, replaying the video for feedback, out bound programs and micro growth labs. This will be handled by experienced faculty of Soft Skills.

1.5.2 Guest Lectures:

Speakers from Multinational Pharma industry / faculty of National repute /our alumni are invited to deliver guest sessions. It is mandatory for each student to attend these sessions.

1.5.3 Value Added Workshops/ Activities:

The Value Added Workshops/ Activities are integral part of curriculum. It is mandatory for all the students to attend all Value Added Workshops/ activities. This shall be in addition to the student performance in Credit courses.

1.5.4 Coursera:

Coursera courses shall be offered to students as value-added learning components. These courses are designed to strengthen students' understanding of emerging technologies and their applications in the pharmaceutical domain. They shall enhance analytical, digital, and strategic competencies aligned with global industry trends. This initiative will support skill development, innovation, and improved employability among students.

2 Placement Guidelines:

NMIMS is a premier University of the country and the B-school is in existence for over four decades. Over the years it has earned recognition from industry & professional associations, corporates, peer group institutions and accreditation agencies. The University has a strong industry connect and is a preferred choice for the corporate sector for talent. Industries view NMIMS as a great place to recruit potential young managers and business leaders. Placement Support is offered to students of various programs across Campuses and Schools. Leading industries across sectors consider our students for recruitments/ internships. Our esteemed alumni occupy senior positions in premier industries and have always supported us in placements.

The Placement Office is an interface between NMIMS & the Industry for facilitating internships & recruitments opportunities for students. Efforts are made to market the programs with their merits.

Placement officials actively network with the corporate sector with an endeavour to get industries to consider offering suitable job & internship profiles for the batch. They reach out to industries across sectors and locations for appropriate opportunities for students, showcasing brand NMIMS, the quality and diversity of the batch, provide timely customized services, maintain continuous communication and offer support that would facilitate their participation in placements.

Placement officials mentor & guide the Student Placement Committee who are actively involved in various placement tasks, connecting with industries, meeting industry officials for presentations, operational aspects and in coordinating several activities during the placement processes.

The placement guidelines are devised by Campus/School in the larger interest of the batch, in consultation with students and faculty. Each of the Schools share with the batch, guidelines related to Resume, PPT, Internships, PPO's/PPI's, Final Placements etc. The School reserves the right to change, modify the guidelines in the best interest of the batch. Students are expected to abide by the guidelines during placement processes. In the event of non-conformance of the placement guidelines, the School reserves the right to initiate corrective action.

Generally, students of the post-graduate programs are keen to participate in placements. However, many from the under-graduate programs opt out or do not register for placements as they have alternative career plans. This approach acknowledges the diverse goals and aspirations of students and features the institution's commitment to support individual choices that align with personal interests and career aspirations. These paths include pursuing further higher studies, preparing for entrance exams of professional programs, civil services, defence forces, government offices, engaging in family business ventures, entrepreneurial endeavours etc.

Industry-Institute Connect

To optimize industry connect, effective interventions from the industries are sought so that students get to know of the opportunities available in the market, help to enhance their skill sets & then direct their efforts to seek profiles of their choice. Industries are encouraged to involve with the batch for campus engagement activities thereby deepening the association and leading to a symbiotic relationship between NMIMS and the Industry. Guest talks, competitions, seminars, workshops, soft skills training, technical training etc. are a great value add. These involvements bridge the gap between expectations of recruiters and knowledge & skill sets of students.

The Placement process typically involves:

- Batch Preparation
- Pre Placement Talks
- Internships/Projects
- Final Placements

Batch Preparation:

The Batch Preparation Program is to enhance the suitability of candidates and orient them to industry practices and expectations.

Interactive sessions with alumni/industry experts in various profiles that help students to gain clarity on role/fit, understanding expectations of the industry, future prospects - career evolution, right approach for cracking interviews, listen to first-hand experience and get a feel of life in a particular profile, etc.

Interaction with seniors who have undergone internships in industries,

Assigning seniors or alumni as mentors to guide students,

Mock interviews with alumni/corporates to get direct feedback from people in relevant industries,

Guest talks and workshops on various topics from corporates,

Resume building as per guidelines,

Technical, Soft skills training, etc.

Prior to the commencement of the selection process, it is expected that students have a fair idea about their interest, sector and specialization and direct their efforts accordingly. This clarity will help the students to land a good internship/job.

Students are expected to research about industry, the business, the sector, financials, other players in the sector, etc. and be prepared with a background and fact file prior to the process. Also, some additional

information – the number of interns/recruits in the past, whether the industry has a PPO policy, the experience of seniors who interned with the industry etc., will be of help.

The Placement Office also involves industries in a number of Campus Engagement activities – corporate contests, projects, workshops, seminars, and guest talks etc. that benefit a large number of students and also helps in promoting the excellent quality of the batch.

Pre-Placement Talk:

Pre-Placement Talks are a medium wherein the industry officials disseminate information regarding their industry, the profile, the compensation etc. and clarify the queries of students.

Internships/Projects:

The Placement Office makes all efforts to reach out for internships across varied sectors, industries and profiles. Based on ones' interests and capabilities, one should seek internships. Choosing the correct industry for internships and performing up to the mark is of utmost importance.

The Internships are not only a window to the corporate world but also a relationship-building tool for NMIMS. It allows the industries to have a look at the talent at NMIMS, thereby strengthening Final Placements.

Internships are a great learning platform for our students and to go for a long way in shaping the learning obtained in the classroom. This experience is of immense value to students to enable them to acclimatize themselves to the intricacies of the corporate world.

The project is expected to build on the theoretical learning with practical experience and help students to discover areas of interest and future career options, identify the gaps in their learning, which they can attempt to fill in.

Interactions during the internships, both with other interns as well as employees, help students to understand the expectations/needs of the organisation, the sector in general, to identify the gaps in their learning, in orienting oneself towards the sector and developing the required skill sets to emerge as the most suitable candidate.

Internships also hold a special significance as it is an apt mechanism for industries to spot bright talent early. Many industries have a structured internship process, which is used as a 'testing ground' to gain a direct understanding of the skill and ability of students, leading to declaration of PPO's/PPI's. NMIMS also encourages candidates to work towards such offers that are based on internship performance.

Pre-Placement Offer (PPO) is an Offer by the industry to the intern acknowledging the excellent work done during the internship. Pre-Placement Interview (PPI) is an opportunity by the industry for the intern to be directly selected for the interview for final placement. Thus, students should be careful in applying to the industries and should put in all efforts to convert the internship into an Offer.

Internships are generally monitored and evaluated by a faculty guide, with periodic report submissions, evaluations, Viva Voce etc.

Final Placements:

Leading industries across sectors aspire to recruit students of NMIMS. Industries devise the eligibility criteria and selection process and have their own set of characteristics or qualities that they look for in a candidate.

The process of selection starts with inviting applications based on the eligibility, job description, compensation details, etc. shared by the industry. The profiles of interested students are shared with the recruiter.

The placement process is facilitated by the Placement Team. However, it is the effort of the student that gets him/her selected for the job. Not getting selected in the first few industries should not lead to panic. Students are advised not to switch profiles in anxiety or haste.

The selection process could be physical or virtual and there could be multiple rounds—case analysis, group discussion, group exercises, interviews etc.

Reasons like location, family issues etc. should not be constraints to students. They are expected to be mobile and have the capability to adjust, adapt and respond to emergent situations successfully.

Students who wish to Opt Out of the placement process should formally notify the Placement Office vide the 'Opted Out Form', mentioning the reason, which could be higher studies, entrepreneurship, family business, seeking placements on their own etc., with details.

Students are expected to honour the sanctity of placements, maintain strict confidentiality, and refrain from sharing sensitive information or posting anything on social media.

Leading industries across sectors participate in our placements offering sought-after profiles with matching packages to students across programs. We deeply value the continued patronage and trust of the corporate sector. Students are requested to understand this sentiment and uphold the reputation of NMIMS at all times.

3.2.11. Grading of performances

Letter grades and grade points allocations:

Based on the performances, each student shall be awarded a final letter grade at the end of the semester for each course. The letter grades and their corresponding grade points are given in table XIV.

Table XIV. Letter grades and grade points equivalent to percentage of marks and performances

Percentage of Marks Obtained	Letter Grade	Grade Point	Performance
90.00 – 100	O	10	Outstanding
80.00 – 89.99	A	9	Excellent
70.00 – 79.99	B	8	Good
60.00 – 69.99	C	7	Fair
50.00 – 59.99	D	6	Average
Less than 50	F	0	Fail
Absent	AB	0	Fail

A student who remains absent for any end semester examination shall be assigned a letter grade of AB and a corresponding grade point of zero. He/she should reappear for the said evaluation/examination in due course.

3.2.12. Semester grade point average (SGPA):

The performance of a student in a semester is indicated by a number called ‘Semester Grade Point Average’ (SGPA). The SGPA is the weighted average of the grade points obtained in all the courses by the student during the semester. For example, if a student takes five courses (Theory/Practical) in a semester with credits C1, C2, C3 and C4 and the student’s grade points in these courses are G1, G2, G3 and G4, respectively, and then students’ SGPA is equal to:

$$\text{SGPA} = \frac{\text{C1G1} + \text{C2G2} + \text{C3G3} + \text{C4G4}}{\text{C1} + \text{C2} + \text{C3} + \text{C4}}$$

The SGPA is calculated to two decimal points. It should be noted that, the SGPA for any semester shall take into consideration the F and AB grade awarded in that semester. For example, if a learner has a F or AB grade in course 4, the SGPA shall then be computed as:

$$\text{SGPA} = \frac{\text{C1G1} + \text{C2G2} + \text{C3G3} + \text{C4* ZERO}}{\text{C1} + \text{C2} + \text{C3} + \text{C4}}$$

3.2.13. Cumulative Grade Point Average (CGPA):

The CGPA is calculated with the SGPA of all the IV semesters to two decimal points and is indicated in final grade report card/final transcript showing the grades of all IV semesters and their courses. The CGPA shall reflect the failed status in case of F grade(s), till the course(s) is/are passed. When the course(s) is/are passed by obtaining a pass grade on subsequent examination(s) the CGPA shall only reflect the new grade and not the fail grades earned earlier. The CGPA is calculated as:

$$\text{CGPA} = \frac{\text{C1S1} + \text{C2S2} + \text{C3S3} + \text{C4S4}}{\text{C1} + \text{C2} + \text{C3} + \text{C4}}$$

where C1, C2, C3,.... is the total number of credits for semester I,II,III,.... and S1,S2, S3,....is the SGPA of semester I,II,III,....

3.2.14. Declaration of class:

The class shall be awarded on the basis of CGPA as follows:

First Class with Distinction	CGPA of. 7.50 and above
First Class	CGPA of 6.00 to 7.49
Second Class	CGPA of 5.00 to 5.99

3.2.15. Project work:

All the students shall undertake a project under the supervision of a teacher in Semester III to IV and submit a report. 4 copies of the project report shall be submitted (typed and bound copy not less than 75 pages). The internal and external examiner appointed by the University shall evaluate the project at the time of the Practical examinations of other semester(s).

3.2.17. Award of Ranks:

Ranks and Medals shall be awarded on the basis of final CGPA. However, candidates who fail in one or more courses during M.Pharm/M.Pharm+MBA program shall not be eligible for award of ranks. Moreover, the candidates should have completed M. Pharm/M.Pharm+MBA program in minimum prescribed number of years, (two years for M.Pharm and three years for M.Pharm+MBA) for the award of Ranks.

3.2.18. Award of degree:

Candidates who fulfill the requirements mentioned above shall be eligible for award of degree during the ensuing convocation.

3.2.19. Duration for completion of the program of study:

The duration for the completion of the program shall be fixed as double the actual duration of the program and the students have to pass within the said period, otherwise they have to get fresh Registration.

3.2.20. Re-admission after break of study:

Candidate who seeks re-admission to the program after break of study has to get the approval from the university by paying a condonation fee.

3.2.21. Minimum Credit Requirements:

The minimum credit points required for the award of M.Pharm. degree is 95. However, based on the credit points earned by the students under the head of Co-curricular activities, a student shall earn a maximum of 100 credit points. These credits are divided into Theory courses, Practical, Seminars, Assignments, Research Work, Discussions with the supervisor, Journal Club and Co-curricular Activities over the duration of four semesters.
